```

Comprehensive Metabolic Panel (CMP)

The Comprehensive Metabolic Panel (CMP) is a blood test that measures the levels of various substances in the blood, including electrolytes, glucose, liver enzymes, and kidney function markers. It is also known as the General Purpose Standing Order (GPSL-CMP).

The CMP is often ordered as part of a routine physical exam or to evaluate a specific health concern. It can help diagnose a wide range of conditions, including diabetes, kidney disease, liver disease, and electrolyte imbalances. It is a useful tool for monitoring ongoing conditions and can help healthcare providers make informed decisions about treatment.
